STEERING DAMPER SD20

PART NO STEERING DAMPER: SD20

Achieve top-tier performance with cutting-edge innovation designed to enhance your bike's handling. Our steering damper redefines stability and front-end control while reducing the impact of road imperfections.

Experience unwavering confidence and control when rolling on the throttle, tipping into fast corners, or braking on entry—whether you're shaving seconds off your lap time or seeking optimal comfort on the open road.

STEERING DAMPER FEATURES

- > Ø20 mm piston
- > New, more advanced design
- > More compact design
- > Improved damping force balance
- > Increased damping force for better control
- > Quicker wobble reduction and safer feel compared to the SD 16
- > Derived from Factory Racing technology
- > Premium titanium-anodized finish
